Minard Map (<https://bigthink.com/strange-maps/229-vital-statistics-of-a-deadly-campaign-the-minard-map>) one of the famous flow map (https://en.wikipedia.org/wiki/Flow_map) inspired us to create the visualization of **the S&P 500 breadth**. The concept of breadth is to illustrate the trend up/down of the US stock market. As an interesting match, our **River Width** plot perfectly illustrate such idea: wider = up (make profit), narrower = down (seek target).

The chart displays the performance of 12 hedge funds over time. The y-axis represents the performance metric, and the x-axis shows dates from November 2020 to March 2021. The funds are stacked in the following order from top to bottom: CND, CNS, COM, ENE, FIN, HLT, IND, MAT, REI, TEC, and UTL. The chart shows a period of high volatility, with a significant peak in early 2021 followed by a sharp decline in late 2020 and early 2021.

CURRENT BREADTH
