About Breadth: how the score is calculated?   ✕
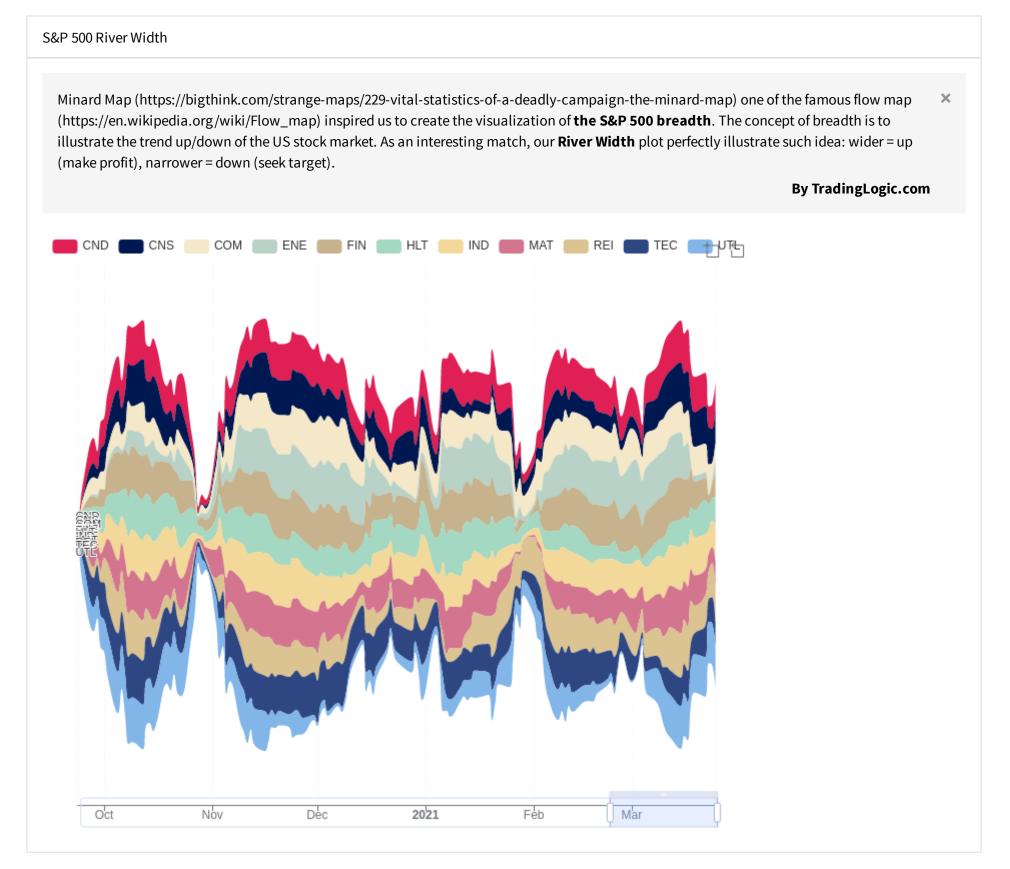

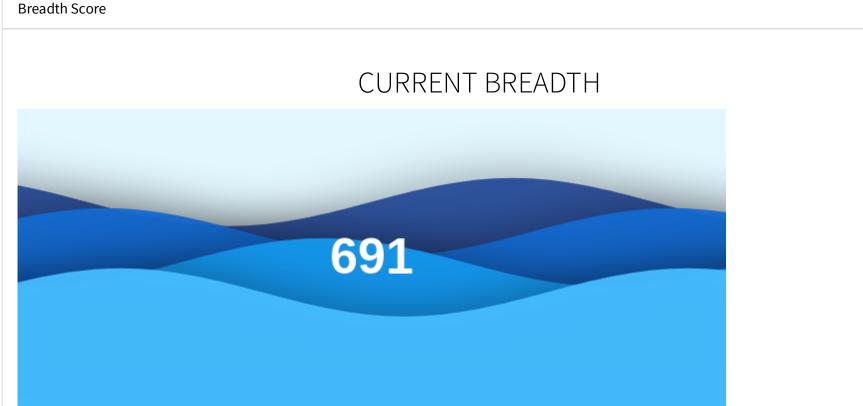

S&P 500 stocks are further categorized into 11 sectors based on Global Industry Classification Standards (GICS).

We calculate the percentage of equities which are above 20 day simple moving average (20-day SMA) by sector. The total breadth score for the SP500 is therefore 100 x 11 = 1100.

We also provide push notification service. You can Join Notification Channel (https://discord.gg/NddCjs72sa) and get notify the Breadth Score change during trading hours.

S&P 500 River Width

Minard Map (https://bigthink.com/strange-maps/229-vital-statistics-of-a-deadly-campaign-the-minard-map) one of the famous flow map (https://en.wikipedia.org/wiki/Flow_map) inspired us to create the visualization of **the S&P 500 breadth**. The concept of breadth is to illustrate the trend up/down of the US stock market. As an interesting match, our **River Width** plot perfectly illustrate such idea: wider = up (make profit), narrower = down (seek target).
